Retail Store Location Scraper

Done by Vasanth M

Lepton Assignment

Approach.

At the beginning I'm searching for the retail store website to scrape the data. Using beautiful soup and python scraped the desired data and stored in a csv file.

Problem faced and Learned things

Problems faced.

- I tried scraping data from the MAX retail store and the request connection was denied
- Second problem was scraping data from the script, and I got the solution move to the next step of the assignment

Learned things while doing assignment

This approach of scraping data was a lot of learning for me. While searching for the retail store, I tried scraping from ZUDIO STORE I got the desired output without even scraping data Using the XHR/Fetch option

Thank you for your time and consideration. I hope to hear from you soon

Sincerely,

Vasanth Madhu
